PADDLE, the new
social enjoyment

Systempadel

PADDLE, the new social enjoyment

The solution to optimization and innovation of your sports and leisure facilities

Our experience as professional advisors in the world of padel makes it possible for us to find **optimal solutions** to help your current or new establishment. We find a new way of doing business, being either if it is a tennis club, a sports center, a hotel, or a leisure center, etc. We optimize your installations and at the same time, we offer more services for users and new clients, giving a **dynamic and innovative image**.

The advantages of padel

- 4 players, a socializing and group sport
- An optimal sport for all ages and types
- Courts of easy construction or transformation (from tennis to padel), both need a total of 200 m²
- Economical installation
- In countries where it has been established it has had a tremendous growth and acceptance (e.g. Spain: there are about 2 million practitioners, with the prediction of doubling this figure in the next 5 years)

Padel represents a sports, leisure and social change

In the last years padel has suffered a gradual popularization of its practice. Padel is an economical sport, enjoyable and easy to play whether you are a beginner or a champion. You can practice at any age and it is very popular among women.

The padel court

The game takes place inside a 10-meters wide and 20-meter long court. The floor is made of concrete with artificial turf or grass covering and the walls are made of a combined structure of glass and metal mesh.

We introduce you
to the future of
racket sports

SYSTEMPADEL offers you

- Technical and sports assessment
- Construction of courts and complete sports centers
